PROFILE

I am Pratham Agarwal. I am pursuing my Bachelors in Technology from Shri Ramdeobaba College of Engineering and Management in Computer Science and Engineering with Specialization in Artificial Intelligence and Machine Learning. My interests include learning something new about technology related computer science. I aspire to become Machine Learning Engineer in my near future. I am currently getting my hands dirty with Linux and Python while doing Data Structures and Algorithms using C++

INTERESTS

Machine Learning

General Knowledge

PROJECTS

Caesar-Cipher

This project was created using basic Python. In ancient times, people used to send encrypted messages using this method and the decryption used to take place using same method

Hangman

This project uses the random module of Python. In this game we have to guess all the alphabets of a random generated word with six attempts in hand. Failing to do so will result in the animated man being hanged

Snake Game

This game is currently in progress. But the building of the game includes the turtle and random module of Python. Once completed, this game will be quite similar to the game we used to play as a child in the old-generation mobile phones
